Team Members/Role:

Lucas Collins   (*Communication Lead*)
Jonny Krysh   (*Webmaster*)
Jake Long   (*Technical Lead*)
Garret Meier   *(Team Lead)*
Derek Yu   (*Key Concept Holder*)

Weekly Summary

We met on Tuesday 1/10 and decided to each focus on getting one's service to a primitive/skeleton version by next meeting (1/19). The plan is to meet every Thursday during regular 492 class time.

Past week accomplishments

- Jake: Created skeleton of user service (1 hr)
- Derek: Fleshed out subscription service (4.5 hr)
- Jonny: Created a frontend shell and worked on prototyping views (5 hr)
- Lucas: Started a skeleton version of the inventory service. (4 hr)
- Garret: Set up external hosting for services, purchased domain, began work on coinage, documented bloodlines, and started learning react (7 hr)

Pending issues

N/A

Individual contributions

NAME	Individual Contributions	Hours week	Hours cumulative
Jake	- Created skeleton of user service	1	1
Garret	- Set up external hosting for services with docker on digitalocean (expresso.store) - Purchased domain and used nginx for routing - Began work on coinage endpoints and database interactions - Documented bloodlines startup and API usage - Started learning react	7	7
Lucas	- Started a skeleton version of the inventory service	4	4

| Derek | ● Flesh out subscription service | 4.5 | 4.5 |
| Jonny | ● Set up and worked on the frontend shell for the Expresso application
 ● Worked on homepage and log-in, as well as setting up initial boilerplate for React, Redux, and other tools we'll need. | 5 | 5 |

Comments and extended discussion

Plan for coming week (please describe as what, who, when)
- Lucas: Get SQL and other basic functionality working in inventory service.
- Jonny: Continue working on frontend, create mock-ups of the application, and hopefully get started on user authentication (this will involve working on our first frontend to backend service calls). Stretch goal: get Stripe API authentication worked into the billing service.
- Jake: Implement logic for user service.
- Garret: Keep learning react, add other services to docker containers, finish coinage database interactions, and add build/run scripts to services.
- Derek: Complete subscription service
- All: -
